

```
1 package br.com.padon.application;
2
3 import org.springframework.boot.SpringApplication;
4 import org.springframework.boot.autoconfigure.
  SpringApplication;
5
6 @SpringBootApplication
7 public class PadonApplication {
8
9     public static void main(String[] args) {
10         SpringApplication.run(PadonApplication.class, args
11     );
12     }
13 }
14
```
